

The screenshot shows the Eclipse IDE with the `Exercise03Test.java` file open. The code defines a `prb3` instance and a `test03` method that uses `@FileParameters` to read test cases from a CSV file. The test cases are listed in the Package Explorer on the left. The Coverage view at the bottom shows 100% coverage for all elements.

Element	Coverage	Covered Instructions	Missed Instructions	Total Instructions
Exercise 03	100.0 %	64	0	64
src	100.0 %	64	0	64
exercise_03	100.0 %	64	0	64
Exercise03.java	100.0 %	42	0	42
Exercise03Test.java	100.0 %	22	0	22
Exercise03Test	100.0 %	22	0	22

The screenshot shows the Eclipse IDE with the `Exercise03.java` file open. The code defines a `calcTotal` method that calculates the total price based on various conditions. The Coverage view at the bottom shows 100% coverage for all elements.

Element	Coverage	Covered Instructions	Missed Instructions	Total Instructions
Exercise 03	100.0 %	64	0	64
src	100.0 %	64	0	64
exercise_03	100.0 %	64	0	64
Exercise03.java	100.0 %	42	0	42
Exercise03Test.java	100.0 %	22	0	22
Exercise03Test	100.0 %	22	0	22
